PAYNORA

Visual Design Documentary

Designing trust, confidence, and safe digital payments for senior citizens.

Making high-risk digital decisions feel safe and reversible.

01 — COLOR PALETTE

Color System

PayNora's color palette is built on semantic meaning 4 each color communicates a specific state or action, reducing the cognitive load on senior users. Blue was chosen as the primary color because research consistently shows it evokes trust, calm, and financial reliability. The semantic colors (green, red, orange) follow universal conventions, helping users instantly understand success, errors, and warnings without reading additional text.

Primary Blue	Primary Hover	Primary Pressed
#4A7329	#3B6B21	#1E3FA8

Neutral Dark	Gray	Light Gray	White
#111827	#6B7280	#F3F4F6	#FFFFFF

Success	Alert	Warning
#0FA958	#DA4A4A	#4F7029

Blue builds trust and safety, while semantic guide user decisions and reduce errors. All color combinations meet WCAG AA contrast requirements for accessible design.

02 — TYPOGRAPHY

Typography System

PayNora uses the Inter font family 4 a highly legible, open-source typeface designed for screen interfaces. Its X-tall height, generous letter spacing, and clear character differentiation make it ideal for senior users who may have reduced visual acuity or are reading on smaller mobile screens. The system defines four distinct size tiers, each with a specific role in the visual hierarchy, ensuring users can always distinguish headings from body text and labels at a glance.

Aa Inter

Google Fonts

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

1234567890 !@#$%&*()+-=

Aa	Aa	Aa	Aa
Regular	Medium	Semi Bold	Bold
400	500	600	700

Heading 1	32px	**The quick brown fox jumps over the lazy dog**
Heading 2	24px	**The quick brown fox jumps over the lazy dog**
Title	20px	**The quick brown fox jumps over the lazy dog**
Body	16px	The quick brown fox jumps over the lazy dog
Label	14px	The quick brown fox jumps over the lazy dog
Caption	12px	The quick brown fox jumps over the lazy dog

Optimized for senior readability with clear hierarchy and high legibility at all sizes.

03 — GRID SYSTEM

Spacing & Layout

PayNora follows an 8pt spacing system to maintain visual consistency, alignment, and predictable layouts across all screens. This grid helps create clear content hierarchy, balanced white space, and touch-friendly interactions for senior users. Consistent spacing improves readability, reduces cognitive load, and ensures every element is placed within comfortable thumb-reach zones.

8pt Spacing System

4px 8px 12px 16px 24px 32px 48px

Built on an 8pt grid system to improve readability, maintain clear hierarchy, and ensure touch-friendly spacing for senior users across all screen sizes.

04 — COMPONENT SYSTEM

Components

PayNora's component library is reusable, scalable, and designed for consistency across all screens. Each component follows strict accessibility guidelines and has been tested with senior users to ensure intuitive interaction. The system reduces development overhead while maintaining a cohesive, trustworthy visual experience.

06 — ACCESSIBILITY & INCLUSIVE DESIGN

Inclusive Design

Accessibility is foundational to PayNora. Every interaction is intentionally designed to support senior users with low vision, reduced motor control, and limited digital familiarity, ensuring they can complete financial tasks independently and with confidence.

44px Touch Targets
Minimum tap area for all interactive elements, reducing accidental taps.

16px Readable Typography
Comfortable body text size that supports effortless reading for seniors without zooming.

4.5:1 Contrast Ratio
All text and interface elements meet WCAG AA contrast requirements.

Clear Action Labels
Buttons and links use simple, descriptive labels.

Large Touch Areas
Generous padding creates forgiving touch zones.

Confident & Independent
Every design decision empowers senior users to navigate digital payments with ease, confidence, and trust.

Human-centered design for digital confidence

With inclusive design at its core, every aspect of the app is tailored for ease of use, ensuring accessibility for seniors with visual impairments and varying levels of tech proficiency.

Helping senior users perform digital payments independently with confidence.

Purpose & Impact

This system was designed to reduce fear, prevent mistakes, and help senior users **perform digital payments independently with confidence.**

PayNora

Trust
Every interaction builds confidence through clear feedback and guided steps.

Clarity
Information hierarchy reduces cognitive load for senior users.

Safety
Reversible actions and practice mode eliminate fear of mistakes.
