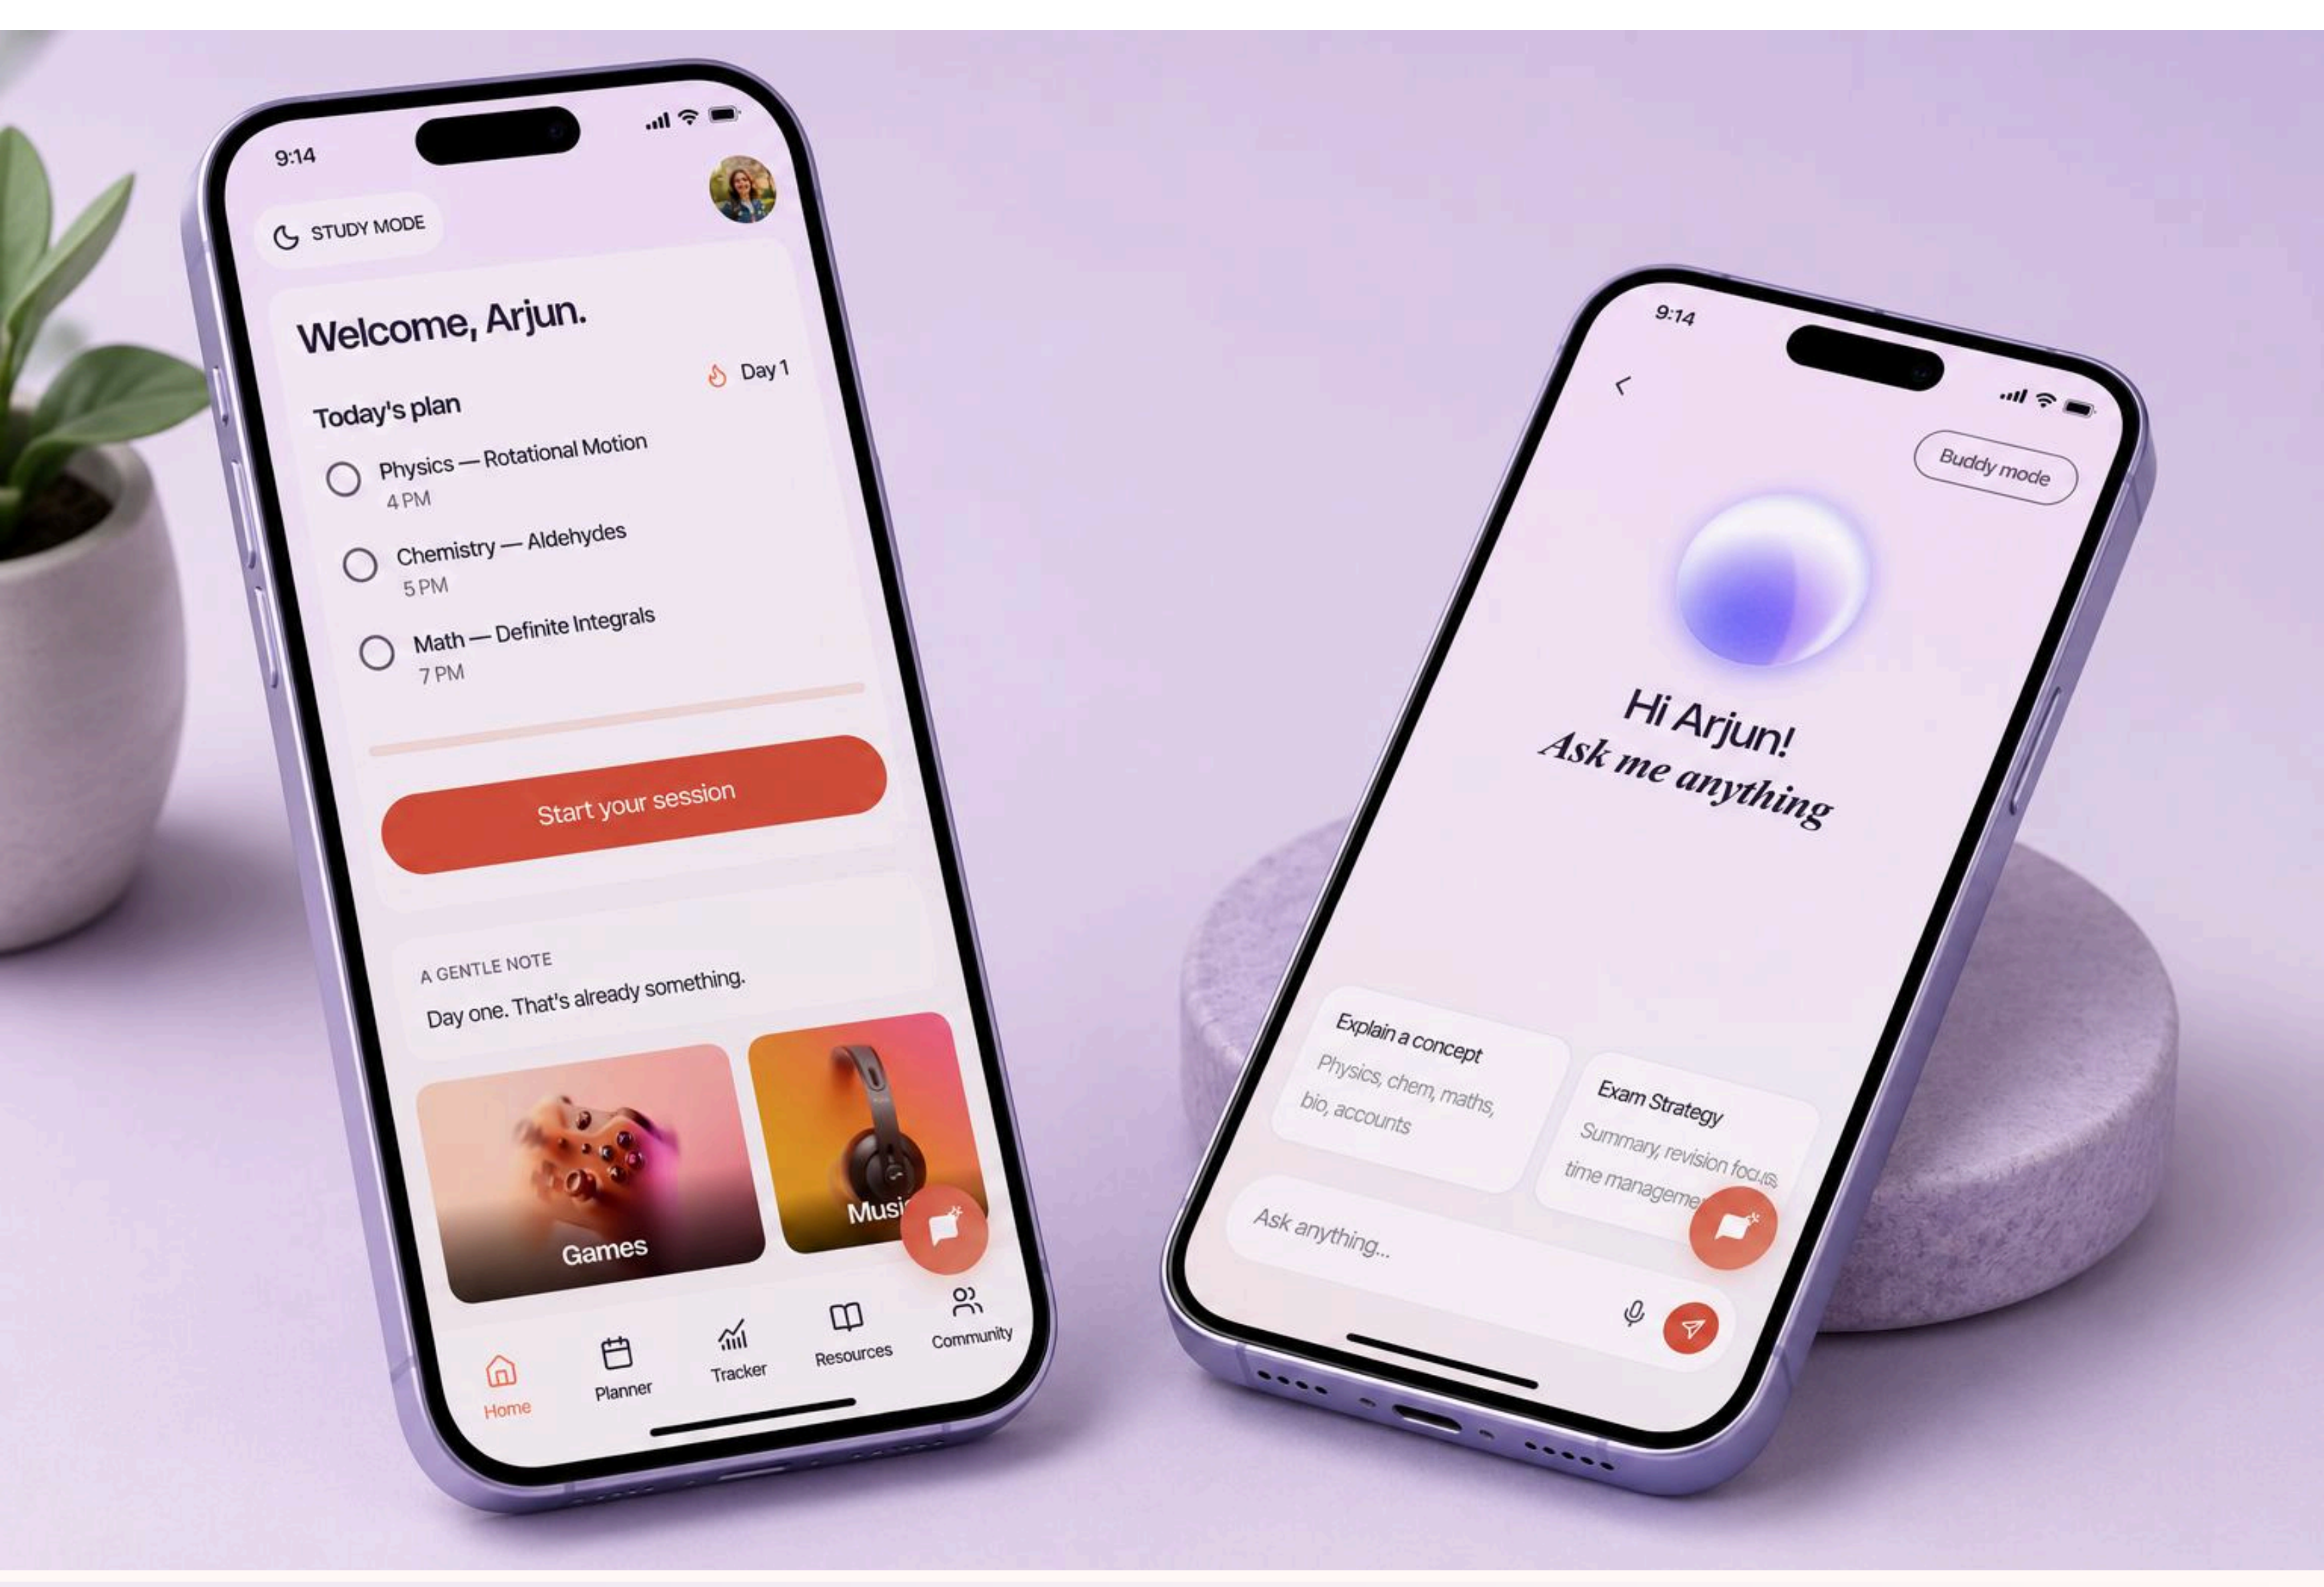
headroom

HEADROOM

VISUAL DESIGN JUSTIFICATION DOCUMENT



SECTION 01

Design System Overview

Headroom's design system is built around a calm, emotionally supportive interface for students preparing for competitive exams. The visual direction combines soft gradients, translucent cards, coral primary actions, aubergine text, and rounded components to create a product that feels supportive rather than demanding.

DESIGN INTENT
Create a visually soft, low-pressure study companion that supports focus, recovery, and emotional safety.

BRAND CHARACTER
Calm, supportive, premium, human, non-clinical, and student-friendly.

CORE UI BEHAVIOR
Guide the student gently with clear hierarchy, generous spacing, and non-aggressive visual feedback.

PRIMARY EXPERIENCE GOAL
Help students feel oriented, reassured, and capable of returning to study momentum.

SECTION 02

Color System & Rationale

The color system uses coral as a warm action color, aubergine for readability and emotional depth, soft lavender/peach gradients for atmosphere, and state colors for success, warning, and critical moments. The palette avoids harsh reds and aggressive contrast.

TEXT / DARK BG	PRIMARY BRAND	SOFT ACCENT	ATMOSPHERIC	BASE NEUTRAL
Aubergine	**Primary Coral**	**Soft Peach**	**Lavender**	**Surface**
#2A1F3A	#FF8870	#F8D8CB	#E8E3F2	#F7F7F7

Semantic Usage & Tokens

TOKEN	VALUE	USAGE	RATIONALE
Primary	#FF8870	CTA, Progress, Active State	Used to draw attention and spark gentle motivation without inducing stress.
On-Surface	#211631	Primary Typography, Headings	A softer alternative to pure black, providing depth and high readability.
Secondary	#AE3025	Focus Highlights, Indicators	Used sparingly to denote critical focus areas and high-priority alerts.
Surface Peach	#FFF5F2	Section BG, Large Cards	Creates a warm, welcoming foundation that feels more human than cold white.
Surface Lavender	#F3F0FB	Deep Atmospheric Layers	Provides a cooling contrast to the coral, used in gradients to ground the UI.

SECTION 03

Typography System

The system separates expressive brand moments from high-readability utility screens using Nohemi and Satoshi.

EXPRESSION

Nohemi

MEDIUM 500 / VARIABLE

XL: TITLE/HEADER 1
The Calm Mind

MD: HEADER 3
Today's Reflection

Used for key headings and brand identity moments.

UTILITY

Satoshi

REGULAR 400 & MEDIUM 500

BODY (LG)
Every student deserves a sanctuary where focus meets peace of mind.

LABEL-MD	BUTTON
TODAY'S PLAN	**Get Started**

HIERARCHY RULES

- Nohemi MD is nav title on Home only.
- Satoshi is for all utility interactions.
- Body (lg) is for AI responses & vents.
- Label-sm is for bottom nav and chips.

SECTION 04

Component Library

Primary Button Secondary Filter Chip

Components use rounded forms, soft borders, translucent card surfaces, and coral action states to maintain consistency across screens.

Cards
Frosted & Rounded

Inputs
Focused/Error states

SECTION 05

Visual Style Direction

Atmosphere	Lavender, peach, and frosted white surfaces create a soft environment suitable for late-night study contexts.
Shape language	Rounded cards, pill buttons, circular avatars, and floating surfaces reduce visual sharpness and create a friendlier emotional tone.
Depth	Subtle glassmorphism and light borders create hierarchy without heavy shadows.
Motion direction	Slow fades, gentle transitions, breathing-like pulses, and non-aggressive feedback.
Imagery direction	Students in real study environments, warm desk light, exam materials, quiet focus, recovery moments, and soft companion visuals.

Product mood palette

SECTION 06

Accessibility

1. **Readable hierarchy**
Use Text/Primary on all white/frosted cards for headings and section labels. Avoid using Text/Secondary for section labels on white cards.

2. **Tap targets**
Buttons, chips, bottom navigation items, and FABs should maintain comfortable mobile touch areas.

3. **Color dependence**
Do not rely only on color for states. Pair color with text, icons, rings, checkmarks, or labels.

4. **Contrast**
Use white text only on coral/brand surfaces. Avoid white text on light gradient backgrounds.

5. **Error handling**
Use the input-error brick only for input fields. Critical/panic surfaces must be reserved for severe support states.

6. **Late-night usability**
Prefer soft contrast, reduced glare, and large readable text for tired students studying at night.

SECTION 07

Key Design Decisions

CORAL AS ACTION COLOR
Primary actions use coral to feel warm and encouraging.

AUBERGINE AS PRIMARY TEXT
Deep aubergine supports readability while keeping the interface emotionally soft.

GENTLE STATE LANGUAGE
Disabled and recovery states are visually soft to avoid guilt.

SECTION 08

Consistency Guidelines

DECISION MAKING
Use one primary CTA per screen
Avoid competing actions. The student should always know the next step.

VISUAL RHYTHM
Maintain card rhythm
Use rounded, frosted cards for task groups, notes, and inputs.

COMMUNICATION
Prioritize emotional clarity
Avoid dense dashboards. Use whitespace, short copy, and progressive disclosure.

IDENTITY
Protect the brand tone
Every screen should feel calm, supportive, non-clinical, and non-judgmental.
