USP & USE CASE OVERVIEW

PayNora

Designing confidence, safety, and independence in every transaction

01 — UNIQUE SELLING PROPOSITION

What Makes PayNORA Different

01

Fear-Free Learning

Seniors can practice digital payments without risking real money, removing fear and hesitation completely.

02

Independence Without Risk

Seniors can complete transactions on their own, with caregiver support only when truly needed.

03

Designed for for Aging Minds

A simple, guided, and mistake-proof experience designed specifically for seniors — not adapted from complex apps.

Fraud Alerts • Trusted Contacts • Guided Confirmation

02 — PRIMARY USE CASE

Use Case — Sending Money Independently

Ramasamy
65-year-old retired shop owner from Pune

01 **Senior Mode** — Simplified interface activated
→ 02 **Practice Mode** — Safe simulation — no real money
→ 03 **Real Payment** — Confidence from practice
→ 04 **Caregiver Approval** — High-value safety check
→ 05 **Success** — Transaction completed independently

Ramasamy no longer depends on others and confidently completes transactions on his own.

03 — WHY THIS MATTERS NOW

Why This Solution Matters

Digital-First India

India's rapid shift toward digital-first payments means millions of seniors risk being excluded from essential financial services they need every day.

The Trust Gap

Senior users face fear, hesitation, and a deep lack of trust when navigating digital payment platforms designed without their needs in mind.

Designing **confidence**, not just **usability**.

04 — IMPACT

PayNORA bridges the gap between usability and emotional trust by making every financial action feel **safe, learnable, and guided.**

Helping senior users perform digital payments independently, confidently, and safely.
